Fed. R. Civ. P. 84.....	12

## **I. INTRODUCTION**

Plaintiff WSOU Investments, LLC’s (“WSOU’s”) first amended complaint (“FAC” or “complaint”) alleges infringement of a single patent: U.S. Patent No. 7,386,630 (the “’630 patent” or the “Asserted Patent”). Dkt. 22 at ¶¶ 17–51. Specifically, WSOU accuses Defendant Hewlett Packard Enterprise Company (“HPE”) of directly and indirectly infringing the ’630 patent because HPE “makes, uses, sells, offers for sale, imports, and/or distributes” certain network routers including “the FlexNetwork MSR Router Series and the FlexNetwork HSR Router Series” routers, which WSOU refers to as the Accused Products. *Id.*

However, WSOU’s complaint fails to state a claim upon which relief could be granted, because, even if the Court accepts WSOU’s factual allegations as true, the complaint fails to plausibly allege that any entity practices each and every element of at least one claim of the ’630 patent. None of the minor changes introduced in WSOU’s FAC resolve the basic deficiencies present in its original complaint. HPE accordingly renews its motion to dismiss. *See* Dkt. 19. As a matter of law, WSOU still does not offer a sufficient allegation that HPE or anyone else directly infringes the asserted claims of the ’630 patent, and this failure also condemns WSOU’s claims for indirect infringement. WSOU’s indirect infringement claim also fails because it does not allege HPE had pre-suit knowledge of the Asserted Patent, nor does it adequately plead the requisite specific intent for inducement. Therefore, HPE respectfully requests the Court grant this motion and dismiss WSOU’s complaint with prejudice.

## **II. STATEMENT OF FACTS**

WSOU alleges infringement by HPE of the ’630 patent, which is directed to a method and apparatus for providing differentiated services over multi-protocol label switching (Diffserv/MPLS) in a communications network. *See* Dkt. 22 ¶¶ 17–51. Claim 18, the only claim

asserted in the complaint<sup>1</sup>, is a method claim directed to a method for defining mapping, network and customer policies that are translated into device specific commands sent to policy targets.

'630 patent, Cl. 18. Claim 18 is set forth below:

18. A method comprising:

defining a mapping policy configured to map between an experimental field and a unique per-hop-behavior;

defining a customer policy comprising a tunneling mode and a tunnel group identifier, the customer policy being configured to govern the treatment of individual customer traffic;

defining a network policy that is configured to define the Diffserv treatment of aggregated traffic;

translating the mapping policy, the network policy and the customer policy into device-specific commands; and

sending the device-specific commands to policy targets, wherein each policy target comprises a network device that includes an interface assigned a role name associated with the customer policy, at least one of the interfaces comprising an egress interface of one of multi-protocol label switching tunnels.

Ex. A to Dkt. 22, '630 patent at 13:32–14:14.

The '630 patent describes “devices, software and methods for policy based management of two combined functionalities (Diffserv over MPLS) in a single network” *Id.* at 4:19–21. A policy server of the patent “includes a customer policy, a network policy and a mapping policy,” and is arranged “to create a group of MPLS tunnels, and associate the tunnels to the mapping policy and the customer policy.” *Id.* at 4:47–50. The customer policy, the network policy and the mapping policy are translated into “device-specific commands,” that are deployed to “policy targets.” *Id.* at 4:53–56. Different types of policies may be used including: “service policies,

---

<sup>1</sup> HPE is aware that WSOU served infringement contentions on November 6, 2020 which assert additional claims. However, those contentions are not part of the FAC, nor are they incorporated by reference. Therefore, they are not for consideration in a Rule 12(b)(6) motion.

network policies, customer policies and mapping policies.” *Id.* at 5:58–60. And IP Operators define or modify these policies. *See id.* at 6:36–67. According to the ’630 patent, “operator” refers to “any technician or organization that maintains or services a packet-based network.” *Id.* at 4:6–8. Thus, the method of claim 18 of the ’630 patent requires a technician or an organization that maintains or services a packet-based network to define the mapping policy, customer policy and network policy.

WSOU accuses certain HPE network routers, including the FlexNetwork MSR Router Series and the FlexNetwork HSR Router Series, of directly infringing claim 18 of the ’630 patent. Dkt. 22 at ¶¶ 21–40. Paragraphs 25–27 of the complaint broadly identify capabilities of the Accused Products without any apparent relation to the allegation of infringement. Paragraphs 30–31, 33–34, and 36 of the complaint appear to contain screenshots from websites containing MPLS configuration guides, QoS configuration guides, and IP Services configuration guides for the Accused Products.<sup>2</sup> Paragraphs 37 and 38, simply state that “The Accused Products are configured to translate the mapping policy, the network policy and the customer policy into device-specific commands and send the device-specific commands to policy targets, wherein each policy target comprises a network device that includes an interface assigned a role name associated with the customer policy, at least one of the interfaces comprising an egress interface of one of multi-protocol label switching tunnels.” and “The Accused Products are configured to send commands to devices, i.e., policy targets, to create and enforce policies. Those devices include routers that serve as the ingress and egress interface of MPLS tunnels associated with

---

<sup>2</sup> On a motion to dismiss, the Court may “consider the complaint in its entirety, as well as other sources courts ordinarily examine when ruling on Rule 12(b)(6) motions to dismiss, in particular, documents incorporated into the complaint by reference, and matters of which a court may take judicial notice.” *See ZitoVault, LLC v. Int’l Bus. Machs. Corp.*, No. 3:16-cv-0962, 2018 WL 2971131, at \*2 n.4 (N.D. Tex. Mar. 29, 2018).

customer policies,” but provides no support for this allegation. Further, WSOU does not identify what or who is performing each step of the claimed method or how. Instead, the complaint merely contains various conclusory statements and naked assertions that the claim is satisfied.

HPE moved to dismiss WSOU’s original complaint on several grounds including (1) failure to plausibly allege that HPE or any third party is responsible for practicing the steps of sole asserted the method claim of the ’630 patent, (2) failure to identify any direct infringer in support of its indirect infringement and induced infringement allegations, (3) failure to allege HPE’s pre-suit knowledge of the ’630 patent in support of those claims, and (4) failure to allege any facts supporting HPE’s specific intent to infringe the ’630 patent in support of those claims. Dkt. 19.

In response to HPE’s motion, WSOU submitted an amended, but largely identical, complaint (the FAC). Dkt. 22. The only substantial difference between the FAC and the original complaint is the addition of paragraphs 44 and 45 of the FAC, which make conclusory allegations of HPE’s knowledge of the patent and infringement and generic allegations of inducing conduct by HPE:

HPE was and is aware that the normal and customary use by end users of the Accused Products infringes the ’630 Patent. Upon information and belief, HPE’s customers and end-users have used and continue to use the Accused Products in the United States in this manner and directly infringe the ’630 Patent. Despite HPE’s knowledge of the ’630 Patent and knowledge and/or willful blindness that its actions induce infringement by customers and/or end-users, HPE has made, sold, and/or offered for sale the Accused Products, and is continuing to do so, with the specific intent to actively encourage customers and/or end-users to make, use, sell, offer for sale and/or import one or more Accused Products in a manner that HPE knows to be infringing.

... On information and belief, HPE directs, controls, and/or encourages customers’ and/or end-users’ performance of the claimed steps by taking active steps that include, but are not limited to: making, using, configuring, and selling the Accused

Products; instructing end-users to use the Accused Products; creating and disseminating advertising and promotional materials that encourage the use of the Accused Products, including product descriptions, operating manuals, configuration guides, support materials, technical materials, and other instructions on how to implement and configure the Accused Products; and providing training and certification programs that teach and demonstrate how to use and/or implement the Accused Products.

*Id.* at ¶¶ 44-45. On their face, these amendments fail to address the deficiencies outlined in HPE’s previous motion to dismiss.<sup>3</sup>

### III. LEGAL STANDARDS

A complaint should be dismissed under Federal Rule of Civil Procedure Rule 12(b)(6) when it fails to “give the defendant fair notice of what the . . . claim is and the grounds upon which it rests.” *Bell Atl. Corp. v. Twombly*, 550 U.S. 544, 555 (2007) (citation omitted) (alteration in original) (“*Twombly*”). The complaint must plead “enough facts to state a claim to relief that is plausible on its face.” *Id.* at 570; *see also Bowlby v. City of Aberdeen, Miss.*, 681 F.3d 215, 219 (5th Cir. 2012). A complaint that alleges facts merely consistent with liability “stops short of the line between possibility and plausibility” and should be dismissed. *Twombly*, 550 U.S. at 546. A complaint is “insufficient if it offers only ‘labels and conclusions,’ or a ‘formulaic recitation of the elements of a cause of action.’” *Bowlby*, 681 F.3d at 219 (quoting *Twombly*, 550 U.S. at 555). “Rule 12(b)(6) authorizes a court to dismiss a claim on the basis of a dispositive issue of law.” *Neitzke v. Williams*, 490 U.S. 319, 326 (1989) (citing *Hishon v. King &*

---

<sup>3</sup> The other, insubstantial changes to the complaint include splitting the original complaint’s ¶ 20 into ¶¶ 21-22 and adding ¶ 23 (advising that WSOU will identify additional accused products) and ¶ 24 (quoting the language of claim 18 alongside a generic allegation that the Accused Products meet its limitations), adding the phrase “are configured to” in relation to WSOU’s direct infringement allegation against the Accused Products in ¶¶ 26-29, 32, and 35-38, as well as dividing the allegations contained in the original complaint’s ¶¶ 32-34 into the FAC’s ¶¶ 40-43 and 46-47.

*Spalding*, 467 U.S. 69, 73 (1984)). Accordingly, if well-pleaded facts still do not state a cognizable theory as a matter of law, dismissal pursuant to Rule 12(b)(6) is warranted.

In a patent suit, a complaint must plead facts that describe *how* the allegedly infringing product infringes. *See De La Vega v. Microsoft Corp.*, 2020 WL 3528411, at \*3–4 (W.D. Tex. Feb. 11, 2020). Thus, the Complaint must “provid[e] facts sufficient to create a plausible inference that each element of the claim [of the patent] is infringed by the accused products.” *Diem LLC v. BigCommerce, Inc.*, No. 6:17-cv-186-JRG-JDL, 2017 WL 9935521, at \*2 (E.D. Tex. May 11, 2017) (emphasis added); *see also TeleSign Corp. v. Twilio, Inc.*, No. 16-cv-2106-PSG, 2016 WL 4703873, at \*3 (C.D. Cal. Aug. 3, 2016) (“[I]n the post-Form 18 world, a plaintiff must include allegations sufficient to permit the court to infer that the accused product infringes each element of at least one claim”) (internal quotations omitted) (alteration omitted). It is not enough to merely identify the accused products and state that they infringe the asserted claim; rather, the “key to patent infringement is ... identifying how those products allegedly infringe the Asserted Patent claims.” *VStream Techs., LLC v. PLR IP Holdings, LLC*, No. 6:15-cv-974-JRG-JDL, Dkt. 153, Ord. at 7 (E.D. Tex. Aug. 24, 2016) (Order attached as Exhibit 1); *see also DoDots Licensing Sols. LLC v. Lenovo Holding Co., Inc.*, No. CV 18-098 (MN), 2018 WL 6629709, at \*2 (D. Del. Dec. 19, 2018). In the case of a method claim, infringement requires performance of the claimed steps, as opposed to sale of an accused product. *Joy Technologies, Inc. v. Flakt, Inc.*, 6 F.3d 770, 773 (Fed. Cir. 1993) (“The law is unequivocal that the sale of equipment to perform a process is not a sale of the process within the meaning of section 271(a).”).

Where “no single actor performs all steps, . . . direct infringement only occurs if ‘the acts of one are attributable to the other such that a single entity is responsible for the infringement.’”

*Eli Lilly and Co. v. Teva Parenteral Meds., Inc.*, 845 F.3d 1357, 1364 (Fed. Cir. 2017) (citation omitted); *see also Nalco Co. v. Chem-Mod, LLC*, 883 F.3d 1337, 1351 (Fed. Cir. 2018). In such cases, a plaintiff must plead facts “sufficient to allow a reasonable inference that all steps of the claimed method are performed and either (1) one party exercises the requisite ‘direction or control’ over the others’ performance or (2) the actors form a joint enterprise such that performance of every step is attributable to the controlling party.” *Lyda v. CBS Corp.*, 838 F.3d 1331, 1339 (Fed. Cir. 2016) (citation omitted); *see also Nalco*, 883 F.3d at 1351-52; *Travel Sentry, Inc. v. Tropp*, 877 F.3d 1370, 1378 (Fed. Cir. 2017); *Akamai Techs., Inc. v. Limelight Networks, Inc.*, 797 F.3d 1020, 1023 (Fed. Cir. 2015).

To plead indirect infringement, the complaint must first plead direct infringement by others. *See Intell. Ventures I LLC v. Motorola Mobility LLC*, 870 F.3d 1320, 1331 (Fed. Cir. 2017) (“[A] finding of direct infringement is predicate to any finding of indirect infringement[.]”); *Enplas Display Device Corp. v. Seoul Semiconductor Co., Ltd.*, 909 F.3d 398, 407 (Fed. Cir. 2018) (same). For both induced and contributory infringement, a plaintiff must also plead facts to support an inference of a defendant’s “knowledge of the patent in suit and knowledge of patent infringement.” *Commil USA, LLC v. Cisco Sys., Inc.*, 135 S. Ct. 1920, 1926 (2015); *see also Addiction & Detoxification Inst. L.L.C. v. Carpenter*, 620 F. App’x 934, 938 (Fed. Cir. 2015).

For induced infringement, a plaintiff must additionally plead facts showing that each defendant “had [a] specific intent to induce the [third party’s] patent infringement.” *Affinity Labs of Tex., LLC v. Toyota Motor N. Am.*, No. W:13-CV-365, 2014 WL 2892285, at \*2 (W.D. Tex. May 12, 2014). The “specific intent” element is “demanding” and requires more than “unsubstantiated assertions” or “generalized allegations” as to the intent of the alleged infringer.

*Id.* at \*7–\*8. Specific intent requires more than knowledge of the induced acts; rather, the accused infringer must have “knowledge that the induced acts constitute patent infringement.”

*Glob.-Tech Appliances, Inc. v. SEB S.A.*, 563 U.S. 754, 766 (2011).

#### **IV. ARGUMENT**

The FAC should be dismissed under Fed. R. Civ. P. 12(b)(6) because it fails to plausibly plead each and every element of its infringement claim. Although the FAC states that “each and every element of at least claim 18 of the ’630 patent” is satisfied, Dkt. 22 at ¶ 39, it fails to support that assertion with plausible factual allegations. Specifically, WSOU fails as a matter of law to demonstrate that HPE or anyone else directly infringes the asserted claims of the ’630 patent, and this failure defeats WSOU’s claims for indirect infringement because direct infringement by others is a necessary predicate to prove active inducement of infringement and contributory infringement. WSOU’s indirect infringement claims cannot survive for multiple other reasons as well.

##### **A. The FAC Fails to Assert a Plausible Claim of Direct Infringement**

WSOU’s direct infringement claim should be dismissed because the FAC does not plausibly allege that HPE or any third party directly infringes the ’630 patent. WSOU alleges that “the Accused Products are configured to practice each and every element of at least claim 18 of the ’630 Patent,” Dkt. 22 at ¶ 39, but WSOU fails to identify any person or entity that is responsible for practicing the steps of the method of claim 18. *See Exergen Corp. v. Wal-Mart Stores, Inc.*, 575 F.3d 1312, 1320 (Fed. Cir. 2009) (“Direct infringement requires a party to perform each and every step or element of a claimed method or product.” (citation omitted)).

In the FAC, WSOU alleges that “the Accused Products are configured to practice each and every element of at least claim 18 of the ’630 Patent,” Dkt. 22 at ¶ 39. WSOU then

repeatedly makes statements that the “Accused Products are configured to practice a method,” Dkt. 22 at ¶¶ 29, the “Accused Products are configured to implement,” Dkt. 22 at ¶ 27, the “Accused Products are configured to define,” Dkt. 22 at ¶¶ 28, 32, and 35,, or generically the “Accused products are configured to,” Dkt. 22 at ¶¶ 37 and 38, each followed by conclusory allegations mimicking the language of the claim. However, products cannot practice a method by themselves, and WSOU does not identify any person or entity that is responsible for practicing the steps of claim 18. *See Packet Intel. LLC v. NetScout Sys., Inc.*, 965 F.3d 1299, 1314-15 (Fed. Cir. 2020) (“Method claims are ‘not directly infringed by the mere sale of an apparatus capable of performing the claimed process.’” (quoting *Joy Techs., Inc. v. Flakt, Inc.*, 6 F.3d 770, 773 (Fed. Cir. 1993))). To allege direct infringement of the asserted claim, WSOU would have to identify a person or entity that performed or practiced each step of the asserted method, not merely point to a product it believes has the capability to perform the method when used. WSOU’s complaint does not identify any third party that allegedly used the claimed method, or otherwise provide evidence that the claimed method was actually used by such an entity.

Additionally, to the extent WSOU meant to allege that HPE itself directly infringes, there is minimal disclosure of “internal use, testing, demonstration and/or configuration” of the products. *See* Dkt. 22 at ¶¶ 40-41. WSOU suggests that “HPE, while teaching others how to use and/or implement the Accused Products, performs demonstrations, and in so doing, practices each and every element of at least claim 18 of the ’630 Patent.” Dkt. 22 at ¶ 42. Such limited disclosure by WSOU fails to explain how, if at all, HPE could have directly infringed all the elements of claim 18, and therefore does not rise to the level required to state a claim for relief. *See De La Vega v. Microsoft Corp.*, 2020 WL 3528411, at \*4–5 (granting dismissal where plaintiff did not “articulate[] any basis that would establish that either [defendant] performed all

of the elements of the claim when it tested the accused products”). Even if the Court accepts such an allegation, such internal testing and/or demonstrations do not underlie a plausible claim for injury/damages. *See id. at* \*5 n.7 (expressing skepticism that plaintiff’s claim of infringement based on defendants’ alleged internal testing could support anything more than “trivial” damages); *see also Packet Intel.*, 965 F.3d at 1315.

Accordingly, the Court should dismiss WSOU’s claim of direct infringement by HPE.

**B. The FAC Fails to Assert a Plausible Claim of Induced or Contributory Infringement**

Despite its amendments, WSOU’s indirect infringement claims remain deficient and should be dismissed. As an initial matter, WSOU’s failure to plausibly allege direct infringement precludes its claims of induced and contributory infringement. Beyond that failing, WSOU’s generic allegations of HPE’s intent to induce infringement are unconnected to any specific, factual allegations that would make that claim plausible, especially in light of WSOU’s allegation of HPE’s knowledge of the patents being limited to post-suit knowledge.

**1. WSOU’s Indirect Infringement Claims Fail without Direct Infringement**

WSOU’s indirect infringement allegations are insufficient as a matter of law as WSOU fails to plausibly allege direct infringement by a third party. *See supra* § IV.A. It is axiomatic that indirect infringement requires direct infringement by another as a predicate. *See Dynacore Holdings Corp. v. U.S. Philips Corp.*, 363 F.3d 1263, 1272 (Fed. Cir. 2004) (“Indirect infringement, whether inducement to infringe or contributory infringement, can only arise in the presence of direct infringement ...”). The FAC names no such specific third party, *see* Dkt. 22 at ¶¶ 43-48 (at no point identifying an alleged direct infringer more specific than “customers, product makers, distributors, retailers, and/or end users of the Accused Products”).

As a result, WSOU has also failed to adequately plead its claims of induced and contributory infringement and these claims should be dismissed.

## 2. WSOU Fails to Allege the Requisite Knowledge for Indirect Infringement

WSOU's indirect infringement allegations fail because they do not plead the required "knowledge of the patent in suit and knowledge of patent infringement." *Commil*, 135 S. Ct. at 1926. As courts in this District have held, an allegation of *pre-suit* knowledge is required to support a claim of indirect infringement. *See Castlemorton Wireless, LLC v. Bose Corp.*, 6:20-cv-00029-ADA, Dkt. 51 at 11 (July 22, 2020) (Order attached as Exhibit 2); *see also Aguirre v. Powerchute Sports, LLC*, No. SA-10-CV-0702 XR, 2011 WL 2471299, at \*3 (W.D. Tex. June 17, 2011) (holding that reliance "on knowledge of [plaintiff's] patent after the lawsuit was filed . . . is insufficient to plead the requisite knowledge for indirect infringement").

Despite this clear requirement, WSOU's sole allegation of knowledge of the patent is a conclusory statement that "***As of the date of service of the initial complaint***, August 18, 2020, HPE has had actual or constructive knowledge of the '630 Patent . . ." Dkt. 22 at ¶ 43 (emphasis added).<sup>4</sup> This Court has rejected materially identical allegations of knowledge. For example, in *Parus*, this Court dismissed indirect infringement claims where a plaintiff's only allegation of knowledge of the patent was that "Defendant Apple has had knowledge of the '431 Patent ***since at least the filing of the original complaint***." *Parus Holdings Inc. v. Apple*

---

<sup>4</sup> WSOU's allegation of knowledge of infringement is likewise deficient, as WSOU alleges such knowledge only "[s]ince the date of service of the initial complaint." Dkt. 22 at ¶ 44; *see, e.g.*, Ex. 4, *Parus Holdings Inc. v. Apple Inc.*, No. 6:19-cv-432, Feb. 20, 2020 Text Order GRANTING Dkt. 54 (W.D. Tex. Feb. 20, 2020) (dismissing indirect infringement claims where the only allegations of knowledge of infringement were that "[b]y the time of trial, Defendant Apple will have known and intended (since receiving such notice) that their continued actions would actively induce the infringement of the claims of the '431 Patent."); Ex. 3, *id.*, Dkt. 28 (Amended Compl.) at ¶ 44.

*Inc.*, No. 6:19-cv-432, at Dkt. 28 (Amended Compl.) at ¶ 44 (emphasis added) (attached as Exhibit 3); *see id.* at Feb. 20, 2020 Text Order GRANTING Dkt. 54 (W.D. Tex. Feb. 20, 2020) (dismissing indirect infringement claims) (Order attached as Exhibit 4). Like the plaintiff in *Parus*, WSOU fails to allege pre-suit knowledge and thus fails to state a claim for indirect infringement. *See id.*; *see also* Ex. 2, *Castlemorton Wireless, LLC v. Bose Corp.*, 6:20-cv-00029-ADA, Dkt. 51 at 11 (July 22, 2020) (“Because Castlemorton’s complaint does not plead any facts that would support an allegation of pre-suit knowledge, the Court **GRANTS** Bose’s motion to dismiss Castlemorton’s indirect infringement claims.”).

The cases WSOU cites in its amended complaint are not to the contrary. *In re Bill of Lading Transmission & Processing Systems Patent Litigation* excused a patentee’s sparse pleading because it relied on the more liberal, but now-defunct, Form 18 pleading standard. 681 F.3d 1323, 1334–35 (Fed. Cir. 2012). *Bill of Lading* is obsolete since the Supreme Court abrogated its basis, the former Federal Rule of Civil Procedure 84. *Steve Madden, Ltd. v. Yves Saint Laurent*, No. 18-cv-7592 (VEC), 2019 WL 2023766, at \*4 (S.D.N.Y. May 8, 2019) (“cases relying on Rule 84 and the form complaints are no longer good law”); *see also Ashcroft v. Iqbal*, 556 U.S. 662, 684 (2009) (“*Twombly* expounded the pleading standard ‘*for all civil actions.*’”) (emphasis added). More recently, *Meetrix IP, LLC v. Cisco Systems, Inc.* found that a failure to allege pre-suit knowledge required at least the dismissal of indirect infringement claims as to pre-suit conduct. No. 1-18-cv-309-LY, 2018 WL 8261315, at \*3 (W.D. Tex. Nov. 30, 2018). WSOU also attempts to rely on the holding in *Frac Shack Inc. v. AFD Petroleum (Texas) Ltd.*, No. 7:19-cv-00026-DC, 2019 WL 3818048, at \*2 (W.D. Tex. June 13, 2019) in which this Court denied defendant GES's motion to dismiss that “[f]or the same reasons that this Court denied the Motion to Dismiss of the other Defendants in this litigation.” An analysis of this Court’s

reasoning when denying the “Motion to Dismiss of the other Defendants” shows that the holding in *Frac Shack* was highly fact-specific.<sup>5</sup> Extending the holding of *Frac Shack* to the present case would be at odds with this Court’s subsequent rulings in *Castlemorton* and *Parus*, as well as earlier precedent from this District in *Meetrix* and *Aguirre*.

WSOU’s induced and contributory infringement claims should be dismissed for this additional, independent reason.

### 3. WSOU Fails to Allege the Requisite Specific Intent for Induced Infringement

WSOU also fails to plead specific intent in support of its inducement claim.

Allegations of specific intent require factual ““evidence of culpable conduct, *directed to encouraging another’s infringement, not merely that the inducer had knowledge of the direct infringer’s activities.*”” *Parity Networks, LLC v. Cisco Sys., Inc.*, No. 6:19-cv-00207-ADA, 2019 WL 3940952, at \*2 (W.D. Tex. July 26, 2019) (quoting *DSU Med. Corp. v. JMS Co., Ltd.*, 471 F.3d 1293, 1306 (Fed. Cir. 2006) (emphasis added)). WSOU’s allegations of specific intent amount to a single conclusory statement that “HPE has made, sold, and/or

---

<sup>5</sup> In *Frac Shack* the “Plaintiff and Defendant AFD Petroleum kn[e]w each other well in terms of patent litigation,” and had been engaged for over five years on a patent litigation related to the then asserted patents. *Frac Shack Inc. v. AFD Petroleum (Texas) Inc.*, No. 7:19-CV-00026-DC, 2019 WL 3818049, at \*4 (W.D. Tex. June 13, 2019). Plaintiff also asserted facts demonstrating that “Defendant AFD Petroleum not only made a substantial design change that would shift AFD Petroleum’s refueling trailer from the ORS design to the Octofueler design, it also submitted a provisional patent application in August 2016 on that Octofueler design-around.” *Id.* Accordingly, this “informed the Court that Defendant had patent counsel engaged in activities that related to the Octofueler and Plaintiffs patents.” *Id.* The Court additionally found that there was a reasonable inference that “Defendants were monitoring the progress of the application for the ’906 Patent, saw that the Patent Office approved the claims, and decommissioned the ORS in anticipation of the ’906 Patent’s issuance.” *Id.* at \*5. The Plaintiff in the matter also sufficiently articulated facts from which a finder of fact could conclude that the knowledge of one of the defendants, AFD Alaska, “was imputed to all the other Defendants through the common ownership and governance of each company.” *Id.* at \*4. WSOU has pled no facts that would support a finding based on the reasoning this Court followed in *Frac Shack*.

offered for sale the Accused Products, and is continuing to do so, with the specific intent to actively encourage customers and/or end-users to make, use, sell, offer for sale and/or import one or more Accused Products in a manner that HPE knows to be infringing.” Dkt. 22, ¶ 44. But, critically, the complaint alleges no facts that suggest any connection between HPE *encouraging its customers to generally use the Accused Products* and their direct infringement, much less an intent to have HPE’s customers directly infringe. WSOU’s conclusory statement that HPE did these things with “specific intent” adds nothing. Dkt. 22, ¶ 44. *See, e.g., Uni-Sys, LLC v. U.S. Tennis Ass’n, Inc.*, 350 F. Supp. 3d 143, 169 (E.D.N.Y. 2018) (plaintiff’s “conclusory allegation that the defendant specifically intended to encourage other defendants’ infringement” did not allege facts sufficient to support induced infringement claim); *Radiation Stabilization Solutions, Inc. v. Varian Med. Sys., Inc.*, No. 11-cv-07701, Mem. Op. & Order, Dkt. 94 at \*6 (N.D. Ill. Aug. 28, 2012) (“RSS improperly relies solely on the conclusory allegation that each Defendant ‘‘had specific intent’’ to [indirectly] infringe with no facts, even contextual facts, to support that allegation.”) (attached as Exhibit 5); *Masimo Corp. v. Sotera Wireless*, No. 19-cv-01100-BAS-NLS, 2020 WL 2306587, at \*9 (S.D. Cal. May 8, 2020) (“the Complaint’s conclusory claim that Foxconn knew and intended the products to be used in an infringing manner does not state a claim that Foxconn knew Sotera’s acts constituted infringement”).

In order to plausibly plead induced infringement, the law requires a threshold showing that HPE induced someone to perform *all of the steps that constitute infringement*. *Cleveland Clinic Found. v. True Health Diagnostics LLC*, 859 F.3d 1352, 1364 (Fed. Cir. 2017) (“The mere knowledge of possible infringement by others does not amount to inducement; specific intent and action to induce infringement must be proven.”); *see also Affinity Labs*, 2014 WL

2892285, at \*7 (dismissing induced infringement claims where “Plaintiff does not specify how the marketing and selling activities of Toyota actually induced third-parties to infringe the Asserted Patents. The complaint generally alleges that Toyota induced its customers to purchase its vehicles, but fails to allege how Toyota induced its customers to use the vehicles in a manner that would violate the Asserted Patents.”).

WSOU’s conclusory allegations fail to present facts that demonstrate: (1) HPE knew that the alleged acts would infringe, and (2) HPE knew that the promotion of their products would induce or encourage others to infringe the Asserted Patent. *See Addiction*, 620 F. App’x at 938 (“[S]imply recit[ing] the legal conclusion that Defendants acted with specific intent” fails to plead “facts that would allow a court to reasonably infer that Defendants had the specific intent to induce infringement.”); *Affinity Labs*, 2014 WL 2892285, at \*7, \*8 (finding “Plaintiffs generalized allegations that Toyota induced others to infringe the Asserted Patents through its marketing and sales tactics are [] insufficient.”).

WSOU’s inducement claim should be dismissed because the FAC is entirely silent on a key requirement of induced infringement.

## V. CONCLUSION

WSOU has failed to assert plausible allegations of infringement against HPE, even after receiving notice of the deficiencies of its original pleading. Rather than allowing WSOU a third chance to file a proper complaint, HPE respectfully requests the Court dismiss the FAC alleging infringement of the ’630 patent *with prejudice* pursuant to Fed. R. Civ. P. 12(b)(6).

Date: November 20, 2020
